

A Clear Look at Living with Invisalign

Invisalign® has plenty of advantages over traditional metal braces. You can remove them. Brushing and flossing are not a problem. You can eat or drink anything you want, without worrying about particles getting stuck. You can enjoy your favorite sports activities. AND people may never notice you're wearing them.

Typically within 9 and 18 months – similar time frame for traditional metal braces – your smile has been gently adjusted to straighten teeth, close gaps, and give you maximum confidence.

Charlotte Dentistry has helped more than 1600 patients with Invisalign, and you can see plenty of examples at our website dedicated just to Invisalign and Invisalign Teen™. But because we want you to see the whole picture of living with Invisalign as it happens, one of our patients, **Taquana “Tabby” Sears**, has agreed to tell us about her Invisalign experience, from day one through her final checkup.

She'll share what happens in this blog, *the good, and the bad*, and she'll let you know what's happening in her mouth and in her life.

Periodically, she'll also have conversations with readers, to answer your questions and give you even more insights into living with Invisalign®.

Dr. Armstrong, will also tell you even more about this remarkable orthodontic treatment through in-depth discussions and **Ask the Expert**.

Charlotte Dentistry is an **Elite Preferred Provider** of **Invisalign** and **Invisalign Teen™**. Only a hand full of all dentistry practices achieve this distinction. In addition, **Dr. Thomas W. Armstrong, DMD** is one of the top **Elite Preferred Providers** in the **nation**, and the leading Elite Preferred Provider in the **Southeast**. Therefore, **Dr. Armstrong** has exceptional experience in helping patients with this method of treatment to create smiles they can be proud of! We can't wait to see you **SMILE!**
